

## USE CASE

# From 200 Reports to 1 View: How CFOs Can Take Back Control of Their Margins

## THE CHALLENGE

Lisa is the CFO of a large health system operating value-based care arrangements across 17 markets. Every month, her inbox fills with a flood of financial reports — 17 at a time, more than 200 over the course of a year. Each one is technically sound, but **they don't add up to a clear financial picture she can act on**. This leaves Lisa with unanswered questions:

*Are we in surplus or deficit position year-to-date?*

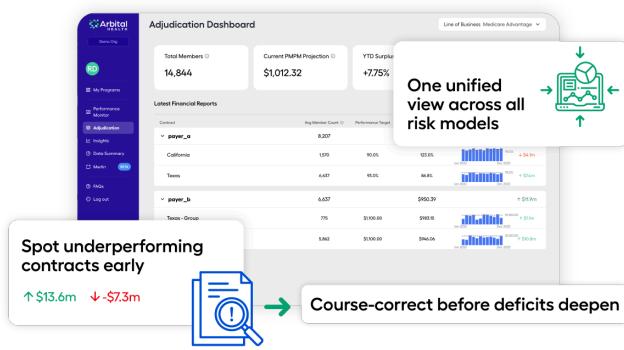

*Which markets are trending poorly and why?*

*Where should we allocate resources to achieve our margin goals?*

Her financial analysts spend weeks pulling numbers into spreadsheets, but still, Lisa feels like she's piecing together a puzzle with missing edges. She can't see **which contracts are slipping** until it's too late.

**Lisa**  
Chief Financial Officer

## THE SOLUTION

With the Arbital Health Platform **Adjudication Dashboard**, Lisa logs in and sees a single view of her entire portfolio. She can **toggle across Medicare Advantage, Medicaid, and Commercial contracts** and immediately spot a Medicaid market that's trending toward deficit. Instead of waiting months for the final claims to roll in, she reallocates staff to intervene right away.

## THE IMPACT

By the end of the quarter, Lisa prevents what **would have been a multi-million-dollar loss**. Her finance team spends less time stitching spreadsheets and more time mitigating potential losses. For the first time, she can walk into the boardroom with confidence and say:

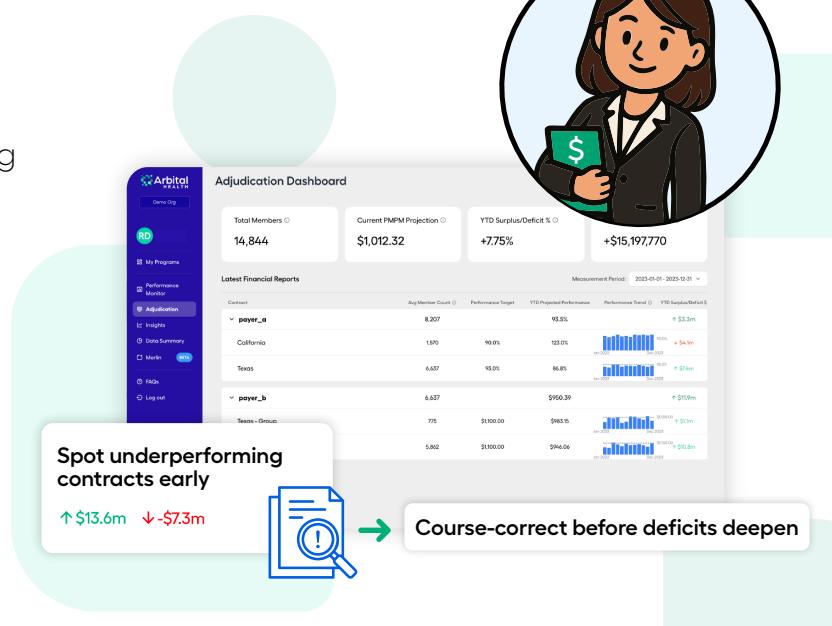

*"Here's where we stand across every contract, and here's where we need to act."*

## THE TAKEAWAY

The Adjudication Dashboard transforms value-based care performance from reactive reporting to proactive strategy. Instead of flying blind while waiting months for claims to settle, executives can:

- ✓ Know instantly whether they are on track to meet financial goals
- ✓ Course-correct early to protect margins
- ✓ Allocate resources where they have the greatest impact
- ✓ Negotiate contracts with real-time data in hand

In a market where financial risk is growing and timelines are shrinking, the Adjudication Dashboard **provides the clarity executives need to lead with confidence**.

Stop stitching spreadsheets. Start leading with real-time insight.
